- Containers: Docker, Kubernetes, AKS, EKS
- CI/CD: Azure DevOps, Jenkins, AWS CodePipeline, Flux
- Emerging Tech: Agentic AI, MCP, AI Workflows, LLM Integration

EXPERIENCE

Consulting System Engineer — Cloud Architect at Fortinet (Canada) 2022.04–Present

Strategic Sales Support: Acted as a key technical resource for strategic pre-sales engagements across Canada, collaborating with Fortinet Sales teams to design and recommend tailored security solutions, helping meet quarterly sales targets and ensuring optimal customer satisfaction.

Customer and Partner Engagements: Led world-class technical meetings, presentations, and product demonstrations to customers and channel partners, including whiteboards and proof-of-value (POV).

Solution Architecture and Design: Partnered with SE peers to architect secure IP networks, leveraging all facets of Fortinet's product line to deliver superior solutions in competitive scenarios.

Risk-Based Security Assessments: Conducted risk-based security assessments and developed test plans to demonstrate platform value in enterprise cloud environments across AWS, Azure, and GCP.

Technical Consultancy: Served as a subject-matter expert in pre-sales design reviews, providing technical guidance to internal stakeholders to drive positive customer outcomes in competitive scenarios.

Training & Mentorship: Led nationwide training for System Engineers and mentored SE specialists within Virtual Teams to enhance technical skills.

Cross-functional Collaboration: Collaborated with Engineering to identify, qualify, and develop key features that strengthen Fortinet's market position.

Technical Documentation: Developed comprehensive technical guides to streamline product demonstrations and emphasize Fortinet's advantages.

Presales Security Expert — Cloud Architect at Fortinet (Federal) 2019.06–2022.04

Sales Support: Acted as the primary technical resource on sales calls, educating customers on features, specifications, functionality, and integration of networking solutions.

Strategic Cloud Partnerships: Established key partnerships with cloud service providers (AWS, Azure, GCP), collaboratively selling and deploying integrated solutions. Conducted risk-based security assessments aligned with SA&A frameworks, expediting customers' Authority to Operate (ATO) process and addressing cloud identity, access management, and certificate requirements.

Federal Sector Selling: Successfully sold tailored solutions to the Federal vertical, enhancing company presence in the sector.

High-Value Deals: Closed multiple significant deals, driving substantial revenue growth.

Presentations: Delivered persuasive presentations to C-suite executives and team members, securing buy-in across all levels of the organization.

Diamond Services Engineer & TAC at Check Point (North-America) 2017.01–2019.06

Customer Engagement: Played a key role in the design, deployment, and maintenance of cloud security solutions for Fortune 100 companies. Additionally, led training on public and private cloud solutions for both internal stakeholders and customers across Canada, the United States, and internationally.

EDUCATION

NETWORK SECURITY PROFESSIONAL PROGRAM. *from Willis College.*

2015–2016
